## Foster-Herz, Inc.

By, Steven Foster, President

Foster-Herz, Inc. is a Virginia Class A Contractor that was formed in 1981. Its President is Steven Foster. We have completed hundreds of projects in Washington, D.C., Suburban Maryland, West Virginia panhandle and Northern Virginia. For the last ten years, we have specialized almost exclusively on projects in Loudoun County, Virginia. Our work includes a mix of commercial and residential projects.

Foster-Herz has been fortunate to work with leading area architects and on custom quality projects. Our projects have been published in Washingtonian Magazine, Southern Living, Remodeler Magazine and House Beautiful. Currently, we are building a custom residence outside of Leesburg, Virginia and other custom remodeling projects in Loudoun County. The custom residence currently under construction, which photos of are attached, was designed by Tom Gilbride Architects of Leesburg, a firm that we often work with.

For the last twenty years, we have had a very successful relationship with our salesman Chuck Plunkett at TW Perry. TW Perry provides us with a large range of items such as framing lumber, windows, interior doors and interior casing on all of our projects. Foster-Herz, Inc. is confident that the reputation we have carefully built over the last thirty years will serve us well no matter what the economic environment may hold.

*Foster-Herz, Inc. is building this beautiful 14,000 sq. ft. custom home on 25 acres in south Leesburg, VA. It will have 3 furnished levels with 4 bedrooms, 8 baths and a complete in-law suite above the garage.*
